Hussein Mohamed Hussein

Junior .NET Backend Developer

Cairo, Egypt issehs023@gmail.com +201288239524 GitHub LinkedIn

Summary

Junior .NET Backend Developer with a Bachelor's degree in Information Technology. Specializes in building scalable, enterprise-level RESTful APIs using .NET 9, Clean Architecture, and the CQRS pattern. Proficient in integrating real-time features, optimizing databases, and deploying applications to the cloud.

Education

Bachelor's degree in Information Technology, *Egyptian E-Learning University* 2022 – 2026
Grade: Excellent with Honors (GPA: 3.64/4.0) Asyut, Egypt

Experience

MedAura — Freelance .NET Backend Developer, *View on Google Play*
- Engineered a secure, scalable backend for a commercial medical e-learning mobile application. Built an encrypted video delivery pipeline with HLS streaming and implemented strict device-binding workflows with admin approvals to prevent account sharing.
- **Stack**: .NET 9, ASP.NET Core, EF Core, SQL Server, MediatR (CQRS), Clean Architecture, Cloudflare R2, FFmpeg. Features role-based access control and advanced video segment caching.

Projects

Torostack, <- *Live Demo* *(Graduation Project)*
- Built a scalable backend utilizing Clean Architecture and CQRS for a real-time coding platform. Engineered a SignalR-based engine for live 1v1 battles with instant matchmaking and integrated a Python AI model for automated code evaluations.
- **Stack**: C#, ASP.NET Core, SQL Server, SignalR, MediatR, Clean Architecture. Features sub-second latency state synchronization and dynamic relational leaderboards.

TicketOk, <- *Live Demo*
- Developed a robust backend system for a comprehensive event ticketing platform designed to handle high-traffic ticket releases. Integrated real-time seat locking mechanisms and dynamic digital wallet workflows to ensure secure bookings.
- **Stack**: .NET 9, ASP.NET Core, EF Core, SQL Server, SignalR, MediatR. Features automated CI/CD deployments and dynamic QR code PDF generation.

SH-Supplements, <- *Live Demo*
- Architected a scalable e-commerce and health ecosystem integrating advanced shopping features and an affiliate coaching portal. Engineered a checkout pipeline with optimistic concurrency control to prevent overselling during real-time flash sales.
- **Stack**: .NET 9, ASP.NET Core, EF Core, SQL Server, SignalR, MediatR. Features a smart stack conflict detector and an anti-counterfeit serial verification system.

Technical Skills

Programming Languages
C#, C++, JavaScript

Real-Time & Cloud
SignalR, Microsoft Azure, Cloudflare R2

Backend Development
.NET 9, ASP.NET Core Web API, Entity Framework Core, ASP.NET Core MVC, LINQ, ASP.NET Core Identity

Tools, CI/CD & Version Control
Git, GitHub, Postman, Swagger, ClickUp, Agile/Scrum, FFmpeg

Architecture & Patterns
Clean Architecture, CQRS (MediatR), RESTful APIs, SOLID Principles, OOP, Design Patterns

Core & Soft Skills
Data Structures, Algorithms, Problem Solving, Teamwork, Time Management

Databases & Caching
SQL Server, Redis (Caching)

Frontend Basics
HTML, CSS
